

Clarification for Swarm DISC ITT 2.3

Kongens Lyngby, 03 Jun 2019

To: **All Potential Tenderers**

Subject: Clarification re. Swarm DISC ITT 2.3

To whom it may concern.

Swarm DISC have received the following question relating to Swarm DISC ITT 2.3:

“The special conditions of tender state in Section 5.3 that “Design references” shall be included. Yet the proposal template does not include this in Section 2. Our interpretation of the Design references is that it appears to be suited to satellite missions, and is not applicable for this ITT. Please confirm, or otherwise could you clarify the meaning of this requirement?”

Answer:

As part of the technical proposal, the tenderer should provide relevant references justifying the method / design of the proposed solution. The proposal template section 2.2 invite you to provide a list of reference publications – this will cover the requested design references:

“Please describe and justify product concept (including list of reference publications)”
